**MEMORANDUM FOR: Deputy Director (Intelligence)**

**SUBJECT: Request from Office of Senator Henry M. Jackson**

1. In 1960 the Agency cooperated with Senator Henry M. Jackson in his capacity as Chairman of the Subcommittee on National Policy Machinery. He had requested from us studies on the national policy machinery in the Soviet Union and in Communist China. The Agency actually prepared full studies on these subjects which were subsequently issued by the Subcommittee without attribution to the Agency. In fact the studies were attributed to the staff of the Subcommittee in cooperation with the Executive Branch.

2. Shortly after the issuance of these two studies by the Subcommittee, they became best sellers and the Subcommittee reported to us that the studies received high praise from the academic world. In recent conversation Senator Jackson's office reports that they still receive many requests for the studies and many comments on the high quality of the studies.

3. Senator Jackson will undertake next year a further study in the national policy field but this new approach will deal with the effectiveness of national security methods, staffing and processes and the capacity of national security staffing, methods and processing to make full use of the nation's resources. For your information, I have attached a copy of S. Res. 332 which authorizes this new effort. Senator Jackson's office has now called us to inquire whether or not

sufficient time has elapsed that revised studies could be published or possibly whether a new study with particular emphasis in line with their new area of interest could be made. I have made no commitments but indicated I would take a quick look into the matter with a view of discussing the subject with them further.

4. Would you please let me know your thoughts on how we should handle this and whether from your viewpoint there is really anything new that can be offered or whether there is any value in trying to assist them.
